

ProLaundry

Best Practice Guide

1.

SORTING

- ✓ Keep clean and dirty linen separate
- ✓ Avoid dragging the linen across the floor
- ✓ Always follow the Care Label instructions
- ✓ Sort the linen according to wash temperature and divide into coloured, white and dark washing using separate baskets

2.

LOADING/WASHING

- ✓ Properly load the machine. Linen should fit comfortably in the drum and not be crammed in for best result.
- ✓ Over-loading reduces mechanical action and has many adverse effects on the wash results and the ironing process
- ✓ Under-loading increases agitation level, and thereby reduces linen life time; under loading also reduces production efficiency
- ✓ Select correct wash programme and temperature
- ✓ Dose the correct amount of detergent according to the dosing instruction. Overdosing does not lead to better wash results
- ✓ Add Comfort Deosoft fabric conditioner for increased softness, to help reduce wear and tear and to facilitate ironing

3.

UNLOADING/DRYING

- ✓ Unload clean linen into CLEAN baskets
- ✓ If items are still stained after washing they should be re-washed straight away. Tumble drying them 'fixes' the stain and makes it much more difficult to remove in the future
- ✓ Always follow the Care Label instructions for tumble drying
- ✓ Always remove linen from the dryer once it has stopped. The longer linen stays in the dryer, the more likely it is that creasing will occur
- ✓ Do not over-dry items, as this can cause shrinkage, greying and a harsh feel

4.

MACHINE MAINTENANCE

- ✓ Regularly clean the detergent and conditioner dosing drawer in the washing machine
- ✓ Ensure detergent dosing drawer and washing machine door are left slightly open between wash cycles to help prevent mould build-up
- ✓ Clean the lint filters of the dryer after each cycle

ProTip

No time for stain removers?
Persil Hygiene not only brightens your whites and removes stains, but it also disinfects at 40 degrees.
